See if this fits the bill. I included time for both project management and for a geologist, consistent with the project statement, with the balance being Expert 3, which I understand is how a senior hydrogeologist would be classified.

Dave

Re: Hanford groundwater monitoring REPA support Subject:

Thanks Dave. Attached is a template for an IGCE. I can fill it out to total \$15,000, however I will need to know approximately how many hours per classification level. thanks

Alan: do you have a copy of Jack's training documents? If so, I would like to make a copy of them.

When the money comes in, I can forward the PWS, IGCE, and TOCOR documentation to the CO to initiate a cost proposal from each Contractor. Thanks
